Tips and tricks by the APIS Support team

Alexander Weiß, APIS IT GmbH

Selection of contents for the FMEA form

- FMEA Forms Management: Button „New“
- Select only system elements at failure mode level!
- Effects and causes are added automatically via the failure net

AP (Action Priority) is not visible

- **No AP catalog available**
- Load AP catalog from template (Menu: „Tools | Read template..“)

- **No AP catalog in template**
- Load AP catalog from the file „Example.fme“ into the template (Menu: „Tools | Update template..“)

- **Display of AP disabled**
- Enable display of AP (Menu: „View | Display options..“), Structure: „...Additional details“, FMEA form: „...Table | Miscellaneous“ and „...Table columns“

- **Rating is not complete**
- Define O, D ratings directly, assign S rating at the effect

New dialog: Read/update template

Only objects with a green arrow (double-click) are loaded or updated.
When updating the template, deletions can also be made in the template via a red "x".

IQ-RM PRO: Update template

Select the components to be written in the template file. Select by double-clicking the arrows in the list on the left.

- AP Catalogs
- Categories for action groups
- Document settings
- Risk matrices
 - Extended risk matrix
 - Extended risk matrix
 - Risk matrix
 - DFMEA Risk matrix for Priority Level
 - Matrice de risques

Destination: NORMAL.FMT (Template file)

- AP Catalogs
- Categories for action groups
- Document settings
- Risk matrices
 - Extended risk matrix
 - Extended risk matrix
 - Risk matrix
 - DFMEA Risk matrix for Priority Level
 - Matrice de risques

Fmea in home office

Software installation:

Local installation of the IQ Software (also NLX Client)
or
remote desktop connection to computer at company workstation

File:

Use local copy of fme file

Optimization of large files

To reduce the file size, you can reorganize the fme file (Menu: „File | Reorganize document“). As *Supervisor* you have additional options.

- Deletion of meeting logs that are no longer required (Menu: „Tools | Forms/Reports | Meeting Log“).
- Removing old entries in the Personal Information Manager (PIM).
- Existing document languages that are no longer needed. To delete an unused language, first change to this language and then remove it using the menu „Tools | Delete document language“.
- Embedding of unnecessarily large graphic files, which then have a significant share in the total file size. The only remedy for this is to delete the graphic and re-integrate a smaller version of the corresponding graphic file.

Reference language in Terminology and translation

Meaning:

- Main language of the document
- Reference (translation) for all other document languages

In Terminology and translation **always** on the left; this column cannot and **should not** be changed in the exported version (Excel).

Terminology and translation: Detection actions				
Drag a column here to group by this column				
Type	L	Deutsch	Instances (165)	English
🔍		🔍 weitere Arbeitsschritte können nicht ausgeführt werden	2	🔍 subsequent process steps cannot be performed
🔍		🔍 Anlötbuchsen werden erst bei vollständig verriegelter Aufnahme freigegeben	1	🔍 soldering area on contact pins is accessible only if appliance lock is fully closed
🔍		🔍 Versuche an Prototypen (B-Muster)	17	🔍 tests with prototype
🔍		🔍 Beschichtungsversuche	2	🔍 test different coatings
🔍		🔍 regelmäßige Überprüfung der Druckerfunktionen	1	🔍 regular check of correct printer function

Creating your own shortcuts

For maintenance customers, the command finder tool should be visible in the first toolbar:

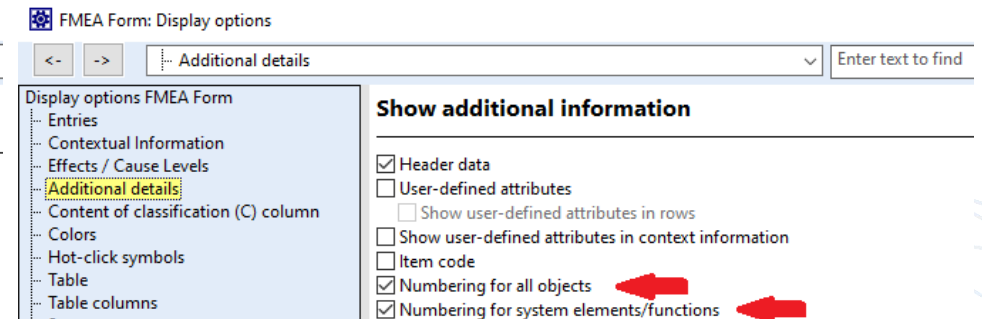

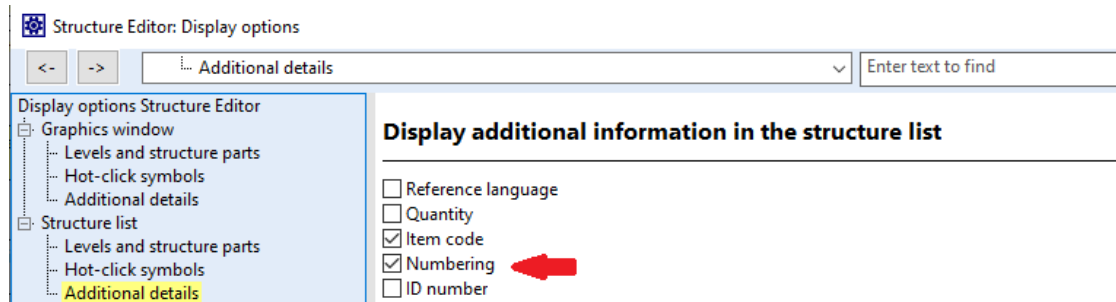

Example: Creating a „Sort by number“ shortcut

- Click on the tool
- Search for „Sort“
- Selection „by Number“ in the sorting criteria
- Right click on selection => Context menu appears
- Click on „Add to favorites“ in the context menu
- Menu „Help | Select command“ shows the new favorites command with Shortcut

When you send screenshots...

...please activate the numbering display

You have got problems?

We can solve them!
