Complex can be so simple.

APIS
Informationstechnologien GmbH

Your partner in
successful FMEA.

DETECT FAILURES BEFORE THEY ARISE

Every process and every product can persist on the market only when every aspect of its quality is convincing. Every stage of product planning and development must be examined in every detail to prevent soft spots and risks from developing in the first place.

The **APIS IQ-Software** is a reference product in the fields of **FMEA and risk analysis**, which helps you effectively to uncover failure potentials already during the planning and development phase of your products, so that your customers are provided with end products in a convincing quality.

Our innovative tools stand out due to their particular **flexibility, user-friendliness, and clearness** and meet every demand made by Failure Mode and Effects Analysis (FMEA), Risk Management (RM), and Functional Safety.

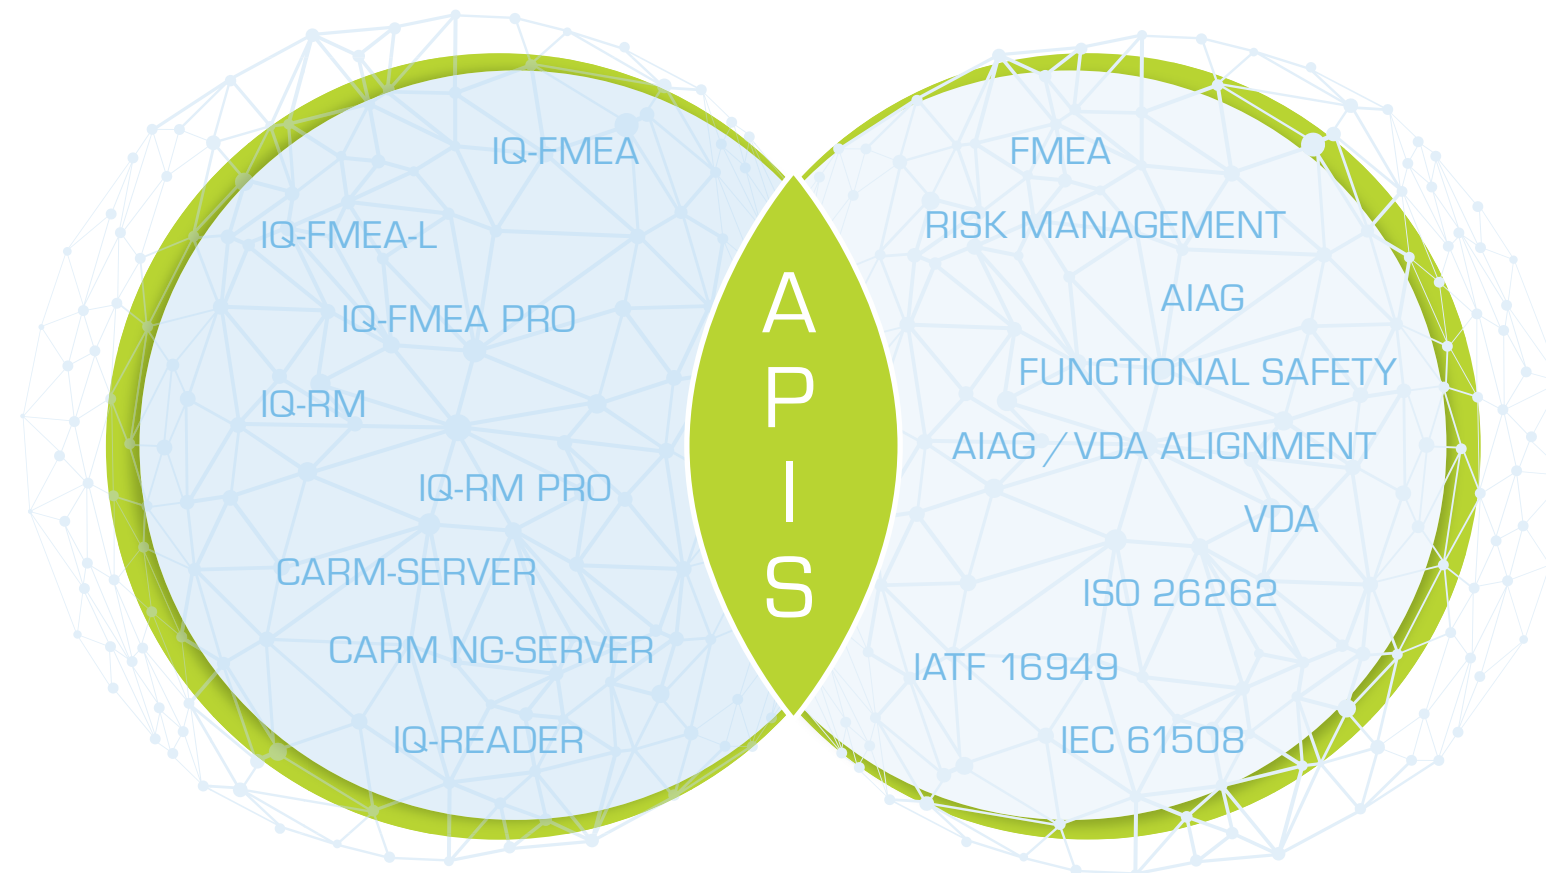

APIS: ALWAYS ONE STEP AHEAD

APIS Informationstechnologien GmbH has been a leading supplier of innovative FMEA software for effective quality management for more than 30 years:

- ▼ **1988:** First prototype developed
- ▼ **1992:** Market entry of APIS IQ-FMEA
- ▼ **Since 1996:** APIS IQ-Software becomes industry standard
- ▼ Continuous development **until today**
- ▼ Long-time expert staff on three locations in Germany
- ▼ Over 1,500 international customers
- ▼ **2016:** APIS North America LLC established

YOUR TOOLS FOR SUCCESSFUL RISK ASSESSMENT

APIS offers the optimal tools for the effective and productive FMEA. Our software is available in numerous configuration levels and thus conforms to your individual needs and requirements.

SURPRISINGLY SIMPLE TO HANDLE. EFFECTIVE TO USE.

OPTIMAL USER-FRIENDLINESS

Model-based charting tools make working for the involved persons simple and well-arranged.

- ▼ Structural representation of all functions and failures of the individual details
- ▼ Documentation of all causes and effects of failures
- ▼ Clear and comprehensible results of analysis

GREATEST EFFICIENCY

Avoiding failures systematically helps reducing costs and saving time.

- ▼ Early identification of risks and soft spots in processes
- ▼ Improvement of reliability and economic efficiency of products and processes
- ▼ Relieve workload of personnel
- ▼ Support with certification

MAXIMUM FLEXIBILITY

Whether large or small business, whether local or global – the APIS IQ-Software conforms to your requirements.

- ▼ To apply irrespective of product and industry
- ▼ For newly developed or changed products and processes
- ▼ Additional modules meet even the most special demands
- ▼ Global partners make our software and services available worldwide

ENHANCED COMMUNICATION

Editing the FMEA simultaneously simplifies the collaboration of all the people involved.

- ▼ Shared state of knowledge
- ▼ Continuous notification of new findings
- ▼ Smooth communication between different departments
